

AI Growth Hackathon

by  Orange Slice

June 27–28th
with support from:

Hackathon WhatsApp

Agenda

Saturday

5:30p — Kickoffs (now)

6:30p — Hacking Starts

7:30p — Dinner

Sunday

9a — Breakfast

1p — Lunch

4p — Projects Due

5p — Finalists Announced, Final Pitches

6p — Winners Announced

Why are we here?

Growth Engineers

1. Write code
2. Run experiments end-to-end
3. Automate themselves with AI
4. Own the entire growth pipeline

Is distribution the only moat?

Project Ideas

Sales Cyborgs: AI-Enhanced Sales (Cluely if it worked lol)

AI Ad Factories: Self-Driving Campaigns, AI-Gen Creative, Optimization Tools

Reading Minds: Agentic Analytics, Signal Detection, Churn, and Lead-Building

Revenue on Autopilot: Cold Outbound & Pipeline Automation

Zero to One: AI-Enhanced PLG & Onboarding

Algorithm Hacking: AI Social Media & Virality Engines

Judging Criteria

1. Usefulness (in a Growth/GTM/RevOps context)
2. Technical Complexity
3. Coolness

other things you might want to consider:

- slides are discouraged. just demo a working project lol

How to Get Judged

1. Submit your open-source project via Vibe Apps with a 3-minute demo video
2. Judges will review and select the best projects
3. Those selected will present onstage in front of everyone
4. Be cool :)

How to Submit Projects

Step: 1:

Create an account at:
<https://vibeapps.dev>

Step: 2: Submit **only** at this url:
<https://convex.link/growthhack>

Step: 3:

Record a **video**

Fill out the submission form

Hit Submit App

Only submit on this form

AI Growth Hackathon by Orange Slice

YC's First-Ever Growth Hackathon!

YC Growth Hackathon Submission Form

What did you build?

App Title*

Site name

App/Project Tagline*

One sentence pitch or description

0/140

Description (Markdown and fenced 'code' blocks supported)

- Problem you're solving
- How the app works
- Notable features
- Why did you build this
- Tech stack list
- Challenges we ran into
- Any success stories or metrics

App/Project Link*

Rules

- Teams may be up to 4 people.
- You cannot work on projects started prior to the hackathon.
 - You can work on a standalone feature or tool that would integrate into your pre-existing project, however it must be built in an entirely separate codebase.
- Projects must be open-sourced on GitHub for the duration of the hackathon. You are free to close-source after the event is over

Housekeeping

- You're welcome to hack on the Ground and 1st Floor
 - 2nd floor and higher is off limits
- No reentry between 12AM–6AM
- Clean up after yourselves!
- Don't be a dick

API Credits + Support

\$50 OpenAI Credits (in your email)

\$50 Cursor Credits (QR code below)

\$50 Orange Slice Credits

\$500 Fiber AI Credits (info below)

Free access to Convex

Cursor Credits

Prizes

1st Place

\$2500 Cash

\$5000 OpenAI API Credits, \$500 Cursor API Credits

2nd Place

\$1500 Cash

\$2500 OpenAI API Credits

3rd Place

\$500 Cash

\$1000 OpenAI API Credits

Hosts + Sponsors!

WELCOME TO THE AI GROWTH HACKATHON

Orange Slice

The AI Growth Engineer

What we do, how we help, and how to build with us — in the app or in code

What we do

Orange Slice is an agentic spreadsheet for GTM. You describe the outcome; AI agents fill the rows — researching companies, enriching contacts, and triggering outreach automatically.

Agents do the work

Research, enrichment & outreach run as autonomous steps

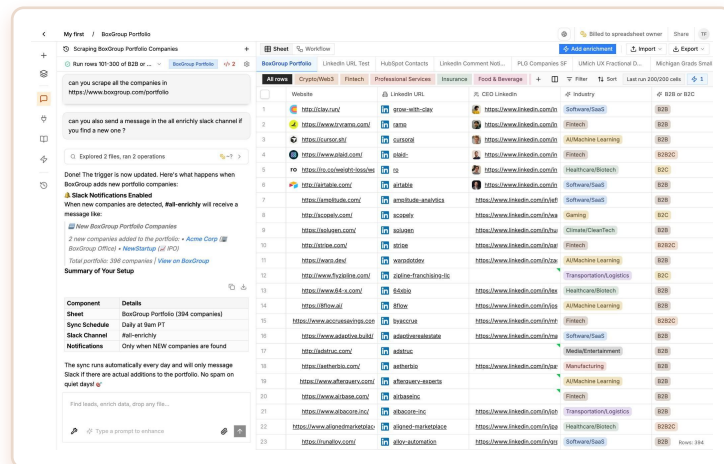

Continuous, not one-off

Workflows re-run as your pipeline and data change

One source of truth

Every signal lands in a spreadsheet you can query

The agentic spreadsheet — AI chat on the left, live enriched data on the right.

Two ways to build with us

Pick the one that fits your team — or mix both. Same platform underneath.

The web app

`orangeslice.ai`

No code. Build agents and workflows in an agentic spreadsheet UI.

- Point-and-click agent columns
- 100+ ready-made enrichments
- Connect tools with one click

Best for marketers & fast prototyping

The package

`npx orangeslice@latest`

Full control. Call the services.* API from your own app or agent.

- ctx · integrations · skills
- B2B research, enrich & scrape
- Drop into any TS/JS project

Best for developers & deeper builds

Build with the web app

orangeslice.ai — go from idea to working GTM agent, no code required.

🔍 Find every company funded by the BoxGroup and get the industry and CXOs for each one				
☐	Company Name	Website	🔗 AI Industry	🔗 C-Suite Executives
1	Clay	 http://clay.run/	Enterprise SaaS - GT	✅ Found 4 executive(s)
2	Tryramp	 https://www.tryramp	Fintech - Business s	✅ Found 2 executive(s)
3	Cursor	 https://cursor.sh/	Developer Tools - AI-	✅ Found 2 executive(s)
4	Plaid	 https://www.plaid.co	Fintech - Open Banki	✅ Found 3 executive(s)
5	Ro	 https://ro.co/weight-	Healthcare Technolo	✅ Found 2 executive(s)
6	Airtable	 http://airtable.com/	Enterprise SaaS - No	✅ Found 2 executive(s)
7	Amplitude	 https://amplitude.co	Enterprise SaaS - Prc	✅ Found 4 executive(s)
8	Scopely	 http://scopely.com/		
9	Solugen	 https://solugen.com/		
10	Stripe	 http://stripe.com/		

Agent columns

Describe an outcome — an agent fills every row.

100+ enrichments

Company & contact data, scraping, news, social.

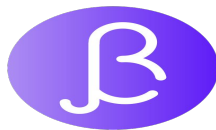

One-click integrations

HubSpot, Salesforce, Gmail, Slack & more.

Build with the package

Every enrichment provider, **under one key.**

One `npx orangeslice@latest` — every provider below behind a single API.

What you can build

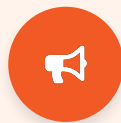

Sales enhancement

Auto-research & score inbound leads

Outbound automation

Agents that personalize & send at scale

Ad automation

Generate & target audiences from enriched data

Analytics

Turn GTM data into live dashboards & answers

Product-led growth

De-anonymize visitors, trigger activation flows

Social optimization

Find engagers, enrich followers, draft content

Let's build together

Sign up with the email you registered with — your credits are already loaded.

Fiber AI - freshest data APIs for AI sales agents

API endpoints nobody else has

Our massive database is continuously updated with 40M+ active, global companies, 850M+ professionals, and 30M+ jobs. We have API endpoints that you won't find on Crustdata, People Data Labs, or Apollo.

Website:

<https://fiber.ai/>

★ Exclusive Reverse lookup a work or personal email to a person →

Customers use this for:

- ★ Enterprises like Docusign use this to enrich accounts that sign up with personal emails
- ★ Old emails in your CRM can be enriched with the person's work history, contact info and more

★ Exclusive Search for a person or company using partial or incomplete information →

Find companies with customer filters unavailable on LinkedIn Sales Navigator →

Find people with a more granular search than even LinkedIn Recruiter →

Get verified work emails, plus personal emails and phones →

★ Exclusive Let AI agents build comprehensive prospect lists from 100+ data sources →

★ Exclusive Fetch real-time LinkedIn company information →

★ Exclusive Fetch real-time LinkedIn profile information →

Bounce detect and verify any email via waterfalls →

View docs

REQUEST

```
curl https://api.fiber.ai/v1/email-to-person/single \
--request POST \
--header 'Content-Type: application/json' \
--data '{
  "apiKey": "YOUR_API_KEY",
  "email": "john@company.com",
}'
```

RESPONSE

```
{
  "data": [
    {
      "first_name": "John",
      "last_name": "Smith",
      "name": "John Smith",
      "headline": "Software Engineer at Tech Corp",
      "locality": "San Francisco, CA",
      "profile_pic": "https://example.com/profile.jpg",
      "url": "https://linkedin.com/in/johnsmith",
      "primary_slug": "johnsmith",
      "current_job": {
        "company_name": "Tech Corp",
        "title": "Software Engineer",
        "is_current": true,
        "start_date": "2022-01",

How teams are integrating our APIs & MCP

API Docs: <https://api.fiber.ai/>

MCP: <https://docs.fiber.ai/article/using-mcp-in-llms>

★ Exclusive Fetch real-time LinkedIn profile information →

Customers use this for:

- ★ SaaS tools update their platform with the most up-to-date information about people, including their full work history, education, skills and more
- ★ Clean up stale data in CRMs

Get verified work emails, plus personal emails and phones →

Customers use this for:

- ★ AI SDR tools use this to get validated work emails and phones via contact waterfall
- ★ Recruiting platforms get personal emails and personal phones, a must in recruiting

★ Exclusive Let AI agents build comprehensive prospect lists from 100+ data sources →

Customers use this for:

- ★ Sales teams find local SMBs that are not listed on sources like LinkedIn and get their business owners/managers for outbound
- ★ SaaS tools find highly rated, local businesses in specific geographic regions

Find companies with customer filters unavailable on LinkedIn Sales Navigator →

Customers use this for:

- ★ Sales teams find companies that get into an accelerator, post specific jobs, hit revenue milestones, are growing headcount, and more

★ Exclusive Reverse lookup a work or personal email to a person →

Customers use this for:

- ★ Enterprises like Docusign use this to enrich accounts that sign up with personal emails
- ★ Old emails in your CRM can be enriched with the person's work history, contact info and more

Join our slack for Q's or if you need more credits

https://join.slack.com/t/fiberhackers/shared_invite/zt-41ual58nm-F7wOan8oWu1E1Ywcq38o2g

On slack I shared my agent harness and gtm tooling I built.

Our team is online during the hackathon to help with ideation, helping you build, using our APIs, etc. - dm us or we can huddle!!!

Adi 3:32 PM

replied to a thread: [Hey everyone, I'm Yi, a full stack AI engineer in SF. I'm thinking of building a Signal to PoC Copilot for growth and sales teams: tak...](#)

Sending this in the main [@channel](#) - I wanted to share the agent harness that I use to do this, as I think it will be helpful for everyone to see

the core idea here is that you have 1 agent finding signals (looking on twitter / linkedin to find relevant posts, looking at launches, looking at comments/reactions on competitors posts, looking at lookalike companies to your customer list, looking at job postings / new announcements like funding)

then a second agent qualifies these companies as a good fit -> and then uses our people-search to find the more target ppl at those companies

then a third agent uses our contact enrichment endpoints to get their work emails, personal emails, and phones

then you can plug this into any automations -> gmail mcp to send emails or anything else like your crm etc. you can also take this list and show them targeted ads by uploading it as a matched audience to linkedin or other places

-> i have lots of insights as i do all the gtm engineering myself at fiber so if anyone has any questions or wants to brainstorm ideas, here as a sounding board!

growth_automation_blueprint ▼

growth_automation_blueprint

Markdown

B2B Sales/Growth Automation Engine — Master Blueprint

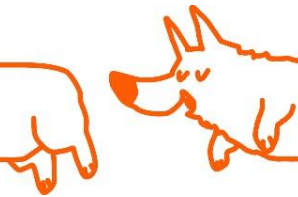

Last updated: 2026-04-22

A reusable, production-tested blueprint for building a fully autonomous outbound growth engine. Adapt the `{{PLACEHOLDERS}}` to your business and ship.

What it does

- Discovers prospects by monitoring (a) engagers on competitor-employee posts on LinkedIn + X/Twitter, (b) keyword-search matches for your category
- Qualifies prospects through 4 LLM gates + a deterministic email-quality check
- Sends prewritten email sequences via Gmail (driven by Chrome) — never generates body copy at runtime
